With respect to claim 98, the prior art does not teach a worm mechanism having a clutch for allowing transmission of rotation from a rotating shaft to worm shaft and blocks transmission of rotation from the worm shaft to the rotating shaft, wherein the clutch includes a plurality of rolling bodies supported in a predetermined spaced relationship by a ring plate, the ring plate having a plurality of axially extending portions for supporting the rolling bodies, the ring plate is movable relative to the driving and driven rotors of the clutch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
